EXPERIENCE

GNRC Medical, North Guwahati

Intern | July-September 2024

- Assisted in psychological assessments and case evaluations
- Applied counseling skills, including active listening and rapport building
- Maintained and reviewed case records with accuracy and attention to detail
- Gained insight into individual behavior, emotional needs, and decision-making

Optimista Learning Hub

Intern | November-December 2022

- Engaged with school students to understand their academic needs and concerns
- Provided guidance on academic pathways and career options
- Addressed student queries and offered counseling support
- Built positive rapport to enhance student engagement and informed decision-making

PROJECT(DISSERTATION)

Influence of Adverse Childhood Experiences on Coping Mechanisms and the Onset of Nicotine Use in Young Adults.

- Conducted a quantitative study to examine the relationship between adverse childhood experiences, coping strategies, and nicotine use.
- Utilized standardized tools including ACE Questionnaire, Brief COPE Inventory, and Fagerström Test for Nicotine Dependence (FTND).
- Analyzed data using Excel/SPSS to identify patterns and correlations.
- Interpreted findings to understand behavioral and psychological factors influencing substance use.
