ACADEMIC PROJECT PROFILE:-

Coding Language:Embedded C

Project: Detecting the conditions of remote areas through data acquisition system using ZIGBEE

- **Coding Language:** Embedded C.
- **Team :** 3 members

Description: The main aim of this project is to detect the conditions of remote areas like temperature, co gas etc. In this project at the transmitter side the sensors the temperature and co gas values will be determined. The sensor values are given to the MCP3202 which is used as ADC. The ADC values are given to microcontroller (AT89S52) from this the values are displayed on LCD as well as to ZigBee in between microcontroller and ZigBee MAX232 is connected which is used as the voltage controller. At the receiver part also ZigBee will be there to receive the transmitter values here also one MAX232 is connected for the voltage conversion the ZigBee values are given to microcontroller. From the microcontroller the temperature and co gas values are displayed on the LCD screen.
