Academic Project:

- | | |
|----------------------|---|
| Project Title | : MANAGEMENT INFORMATION SYSTEM |
| Company | : TVS Sundram Fasteners Ltd., |
| Platform | : J2EE platform using MySQL5.1 as backend |

Description : System Administration of the company is tracking the management of user's particular assets. All the controls of the user's hardware and software of the system are managed by the administrator by the use of this application. Each and every user's assets are interlinked to the server which is uniquely used by the administrator. Admin retrieves the issue of the user's queries which is related to their software and hardware complaints. Issue will be assigned to the related engineers by their project managers based on the call priority and their availability. The queries are worked by the engineers until the solution of the issue has been satisfied by the user
